
PATHWAY / FUNCTION
A ENRICHMENT
B GENE MEMBERSHIP
U2-type Prespliceosome Assembly
Spliceosomal Complex Assembly
mRNA Splicing - Minor Pathway
Nuclear-transcribed mRNA Catabolic Process
Activation of NF-kappaB In B Cells
Cross-presentation of Soluble Exogenous Antigens (Endosomes)
Metabolism of Polyamines
RUNX1 Regulates Transcription of Genes Involved In Differentiation of HSCs
Regulation of Ornithine Decarboxylase (ODC)
Asymmetric Localization of PCP Proteins
Autodegradation of E3 Ubiquitin Ligase COP1
Cross-presentation of Soluble Exogenous Antigens (Endosomes)
Metabolism of Polyamines
Regulation of Ornithine Decarboxylase (ODC)
